

Looping Statement in JS Assignment

Q1. (for loop – basic counting)

Write a program using a **for loop** to print numbers from **1 to 10**.

Q2. (for loop – reverse counting)

Write a program using a **for loop** to print numbers from **10 to 1**.

Q3. (while loop)

Write a program using a **while loop** to print numbers from **1 to 5**.

Q4. (do...while loop)

Write a program using a **do...while loop** to print numbers from **1 to 5**.
(The loop should execute at least once.)

Q5. (for...of loop – array values)

Given an array:

```
let colors = ["Red", "Green", "Blue"];
```

Use a **for...of loop** to print each color.

Q6. (for...in loop – object keys and values)

Given an object:

```
let car = {  
  brand: "Toyota",  
  model: "Fortuner",  
  year: 2023  
};
```

Use a **for...in loop** to print all keys and their values.

Q7. (break statement)

Write a program using a **for loop** that prints numbers from **1 to 10**, but **stops the loop when the number becomes 5**.

Q8. (continue statement)

Write a program using a **for loop** that prints numbers from **1 to 10**, but **skips the number 7**.

Q9. (loop for array index and value)

Given an array:

```
let fruits = ["Apple", "Banana", "Mango"];
```

Use a loop to print output in the following format:

```
0 : Apple
1 : Banana
2 : Mango
```

Q10. (map function)

Given an array:

```
let arr = [10,20,30,40,50,60,70,80,90,100];
```

Use the **map() function** to return a **new array containing squares of each element**.

Q11. (even numbers using loop)

Write a program to print **all even numbers from 1 to 100** using a loop.

Q12. (Random Guess Number Game – Loop Based)

Create a **number guessing game** with the following rules:

- Set a **fixed number from the game side**
- Take user input inside a loop
- The loop should keep running **until the user enters the correct number**

When the correct number is entered, display: Congrats
